Profile

Highly skilled and detail-oriented Data Analyst with over 2 years of experience in analyzing complex datasets and providing valuable insights to drive data-driven decision-making. Proficient in utilizing advanced statistical techniques and data visualization tools to effectively communicate findings to stakeholders. Seeking a challenging role in a dynamic organization where I can leverage my strong analytical skills and contribute to the company's success by uncovering patterns, trends, and opportunities within data.

Skills

Python

(Pandas | Numpy | Matplotlib | Seaborn)

Statistics

(Statistical Testing(ANOVA) | Descriptive Statistics | Statistical Modeling Predictive Analytics)

Version Control Tools

(Git | Github | Gitlab)

Database

(MYSQL | MongoDB | DinamoDB)

Power BI

(Advance Visualization | DAX | Power Query Editor | Data Modeling)

Machine Learning

(Linear Regression | Logistic Regression | Decision Tree | Random Forest)

Professional Experience

Senior Business Analyst, Polylon Fabrics Pvt Ltd

2022 Jan – present

- Analyzing large and diverse data sets related to products and customers, identifying trends & patterns, and providing actionable insights.
- Strong hands-on experience in Data management ,data modeling, data transformation and data visualization using Python and MySQL ,Creating and designing interactive dashboards and reports using Power BI, and Tableau

Projects

Health Premium Insurance Prediction with Machine Learning

- Cleaned & analyzed the Health Premium Insurance dataset with 1.3k rows and 7 columns
- Trained linear Models, distance-based, Tree-based & Boosted trees using scikit-learn & XG-Boost
- Achieved r2 score of 0.88 for test dataset and Deployed the flask app with best model on AWS EC2.

Forecasting Sales for a Large chain of Stores, A Time Series approach to forecast sales

- **Problem:** Sales data, for 33 months, is given for Russia's one of the biggest stores. We need to use that data to forecast sales for next month.
- **Approach:** This is a time series problem. The given features are not enough to help forecast sales and reduce RMSE value. Challenge is to come out with Feature Engineered Columns which can help reduce RMSE value.
- **Use Case:** This methodology can be used to forecast the sales in stores, the forecast which takes into effect the seasonality and trends and hence help the store manage the inventory and workforce which can help in smooth functioning of business.

PowerBi Projects

- Atliq Hardware Business analysis with PowerBI
- Adventure work cycle Business Analysis with PowerBI
- Heart Disease diagnosis Analysis with PowerBi
- Bookshop Dashboard with Excel and Tableau

Education

Master In Business Analysis, PROTON BUSINESS SCHOOL

Bachelor of Electronics Engineering, R.C. PATEL INSTITUTE OF TECHNOLOGY
